- Notion Workspace & Database Organization
- Workflow Documentation & Process Mapping
- Basic APIs, Webhooks & JSON Data Handling
- JavaScript Basics for n8n Code Nodes
- Email & Inbox Management
- Administrative Support & Data Entry
- Online Research & Lead/Contact Organization
- Social Media Content Support
- Task Tracking & Daily Reports
- Customer Inquiry Support

TOOLS

- n8n
- ChatGPT / AI Assistant Tools
- OpenRouter AI
- Google Workspace: Docs, Sheets, Slides, Forms, Drive, Gmail, Calendar
- Notion
- Telegram Bot API / Telegram Workflows
- Discord / Community Platforms
- Microsoft Office: Word, Excel, PowerPoint, Outlook
- Canva
- Loom
- CapCut

PORTFOLIO PROJECTS

AI-Powered Restaurant Management System

Tools: n8n, Telegram Bot API, Google Sheets, OpenRouter AI, JavaScript

- Built a demo AI-assisted restaurant workflow that supports customer ordering through Telegram.
- Created automation logic for menu questions, product recommendations, order capture, total calculation, and unique Order ID generation.
- Connected order records to Google Sheets for tracking, status updates, and reporting.
- Added real-time staff notifications for new orders, customer details, ordered items, total amount, and Order ID.
- Included order status management using Telegram commands such as Ready [Customer Name] and Cancel [Customer Name].
- Added customer loyalty tracking, VIP status logic, daily reports, and monthly business performance reporting.
- Demonstrates practical workflow automation, AI integration, data management, and business process automation.

Crypto News Collector

Tools: n8n, RSS Feeds, OpenRouter AI, Notion, JavaScript

- Built a demo research and content workflow that collects crypto news from multiple RSS sources.
- Used filtering, limit nodes, merging logic, duplicate removal, and AI-assisted processing to organize useful updates.
- Prepared news items for tracking, summarizing, research, and social media/content planning.
- Connected the workflow to a database/tracker for reviewing and organizing important updates.
- Demonstrates automated research support, content workflow planning, and multi-source data handling.

WORK EXPERIENCE

Virtual Assistant / Admin Support

Remote | 2025–Present

- Managed and organized emails to keep inboxes clean, updated, and easy to review.
- Sorted, prioritized, and tracked important messages, tasks, and follow-ups.
- Prepared daily reports, task updates, organized records, and simple tracking systems based on client instructions.
- Assisted with data entry, online research, document organization, and content preparation.

- Supported workflow systems using tools such as Notion, Google Workspace, community platforms, Telegram, and AI assistant tools.
- Helped prepare AI-assisted drafts, summaries, and organized content for review.
- Maintained clear communication, followed deadlines, and documented processes when needed.

SOCIAL MEDIA & CONTENT SUPPORT

- Can support LinkedIn, X/Twitter, Discord/community content planning, and AI-assisted crypto/AI news reports.
- Can organize content calendars, draft post ideas, summarize news, and prepare platform-specific content for review.
- Can help document approval workflows and suggest automation ideas for repeated social media tasks.

EDUCATION & PROFESSIONAL DEVELOPMENT

High School Diploma

Ongoing self-training in n8n workflow automation, AI tools, Notion workflows, Google Sheets systems, Telegram/community workflows, email management, and automation-assisted admin systems.

AVAILABILITY

Available immediately for remote part-time or full-time work.
